

Manufacturing

A manufacturing solution to help you optimize your production scheduling and meet customer expectations.

With increasing customer demands, manufacturers are under constant pressure to deliver products quicker while trying to keep costs down and improve margins.

Spire recognizes the significance of these challenges and has designed a solution to meet the unique needs of manufacturing companies.

Manufacturers using our business management software will benefit from:

Simplified Production Planning

- Reduce lead times and have confidence in knowing that you will deliver on time
- Streamline and automate production and scheduling processes
- Material requirements and capacity planning optimization

Efficient Inventory Management

- Improve replenishment with accurate inventory tracking
- Lot traceability

Better Insight

- Increase production visibility
- Quicker decision-making with real-time information
- Reporting tools to monitor key indicators

Integrated Accounting

- Full integration with AR, AP, General Ledger, and Bank Reconciliation modules
- Access to all vendor history and information
- Post purchase orders and sales to jobs

Improved Costing

- Track raw materials, purchases, and labour costs
- Accurate job costing to help ensure profitability
- Set scrap and yield factors
